Fabric Inspection Machines / BIM

The B-Tex Inspection machine BIM is a perfect and reliable tool for detecting fabric defects and incorrect sizes. BIM guarantees that only high quality fabric is delivered at minimum costs. B-Tex has machines both for grey inspection and finish inspection.

B-Tex offers number of fabric inspection and input/output variations with a wide range of optional equipments, which provides flexible inspection routines. Flexible design enables the customer to design his own machine.

BIM can be equipped with PLC and Data logging system for inspection report generation.
